OBJECTIVE

Software Developer with expertise in C#, ASP.NET Core MVC, and Entity Framework Core, building secure and scalable web applications. Skilled in SQL Server, clean architecture, and applying SOLID principles for robust backend solutions.

EXPERIENCE

Spark Systems — Back-end C# .net Developer Jan 2025 - Present *Giza, Egypt*

- Developed and maintained scalable back-end applications with ASP.NET Core MVC, C#, Razor Pages, and Entity Framework Core, ensuring efficient data management and database interactions.
- Designed and optimized SQL Server and PostgreSQL schemas, writing complex LINQ queries for scalability and query performance.
- Applied SOLID principles and Clean Architecture, creating maintainable and testable code using Repository and Unit of Work patterns.
- Built dynamic front-end components with HTML, CSS, Bootstrap, and jQuery, integrating seamlessly with back-end logic.
- Developed RESTful APIs, ensuring smooth external communication and validating endpoints with Postman and Swagger.
- Implemented secure authentication and role-based access with ASP.NET Identity, managing roles and claims.
- Leveraged Git for version control, following Git Flow for streamlined collaboration and release management.
- Used Dependency Injection to improve modularity, reduce coupling, and enhance unit testability.
- Contributed to Agile Scrum teams, applying SDLC best practices for iterative software delivery.
- Utilized tools like Rider, Visual Studio, Docker, and Jenkins for CI/CD, development, and deployment automation.

Valeo — Embedded Software Engineer Intern July 2022 - October 2023 *Smart Village, Egypt*

- Designed and developed multithreaded C/C++ embedded software, focusing on scalability, performance, and hardware abstraction, and implemented/validated communication protocols, memory management, boot mechanisms, and low-level drivers.
- Performed system-level debugging, optimization, and functional/non-functional testing across embedded platforms, while ensuring compliance with modern C++ standards (C++11–23) and safety/coding standards.

EDUCATION

Bachelor of Computer Science, Helwan University September 2019 - July 2023 Grade: Very Good.

- Consistently led all university projects, culminating in successfully directing the team as the leader during the graduation project.

SKILLS

- C, C++, C#, Python, JavaScript, Relational & NoSQL Databases
- Embedded Systems, Backend Development, Algorithms & Data Structure, Problem solving.
- Languages: Fluent English, Native Arabic, Beginner French
